SUMMARY

Senior Front-End Developer with 6+ years of experience building scalable, high-performance web applications with React.js, Next.js, and TypeScript for enterprise, government, and IoT products. Proven track record of improving Core Web Vitals and page load times by up to 40%, cutting production bugs by 40% through automated testing, and reducing development time by 25% with reusable component libraries and design systems. Experienced in leading front-end architecture decisions, mentoring engineers, and delivering user-centric products in Agile/Scrum teams.

EXPERIENCE

Senior Front-End Developer

AZM X | Riyadh, Saudi Arabia | August 2024 – Present

- Architected and built scalable, responsive web applications using React.js, Next.js 14, and TypeScript, serving high-traffic enterprise platforms.
- Improved Core Web Vitals (LCP, CLS, INP) through server-side rendering, code splitting, image optimization, and bundle analysis, reducing page load time by 35% and boosting SEO rankings.
- Designed and maintained a reusable component library with Storybook, cutting feature delivery time by 25% and enforcing UI consistency across 4+ product teams.
- Implemented robust state and server-cache management with Redux Toolkit, RTK Query, and React Context, reducing redundant API calls by 30%.
- Integrated RESTful and third-party APIs (payments, authentication, analytics) with resilient error handling and loading states.
- Mentored 4 junior and mid-level developers through pair programming and structured code reviews, raising pull request quality and reducing review cycles.
- Established front-end coding standards, ESLint/Prettier configurations, and Git workflows adopted organization-wide.
- Partnered with product managers, UX designers, and backend engineers in Agile/Scrum ceremonies to deliver features on schedule every sprint.

Senior Front-End Developer

TAM | Riyadh, Saudi Arabia | August 2023 – July 2024

- Developed and maintained high-performance web applications with React and Redux, building complex interfaces from reusable components and reducing development time by 25%.
- Improved load times by 30% through code splitting, lazy loading, memoization, and performance profiling with Chrome DevTools and Lighthouse.
- Integrated RESTful APIs and translated Figma wireframes into responsive, accessible interfaces, increasing user engagement by 20%.
- Reduced production bugs by 40% by introducing unit, integration, and end-to-end testing with Jest, React Testing Library, and Cypress.
- Conducted code reviews and enforced coding standards across the front-end team.

Senior Front-End Developer

Tabasher | Riyadh, Saudi Arabia | November 2021 – July 2023

- Built and maintained the company's core web application with Next.js and TypeScript, increasing page load speed by 20%.
- Optimized performance through code splitting, lazy loading, and caching strategies (ISR, CDN, SWR), reducing server response time by 40%.
- Collaborated with designers and backend developers to ship new features, improving user satisfaction scores by 30%.
- Led code reviews and quality initiatives that decreased bug occurrences by 15%.
- Contributed to sprint planning, estimation, and retrospectives, helping increase team velocity by 25%.

Front-End Developer

Unifi Solution | Alexandria, Egypt | February 2020 – October 2021

- Built the front end of an IoT platform with React.js for real-time monitoring and control of connected devices.
- Developed live dashboards with real-time data streaming (WebSockets/MQTT), interactive charts, and device status visualizations.
- Translated UI/UX wireframes into responsive, cross-browser, WCAG-accessible interfaces using HTML5, CSS3, and Sass.
- Improved dashboard load speed by 30% through Webpack optimization, code splitting, and efficient data-fetching strategies.

Front-End Developer

AIT Systems | Alexandria, Egypt | January 2019 – January 2020

- Built and optimized web applications with React and Redux, improving performance and user experience.
- Led performance optimization efforts using code splitting and lazy loading, reducing load times by 30%.
- Collaborated with design and backend teams to deliver features end to end, on time and to spec.
- Applied user-centered design principles that increased user engagement by 20%.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js (App Router, SSR, SSG, ISR), Redux, Redux Toolkit, RTK Query, React Query (TanStack Query), Zustand, React Hook Form, React Router

Styling & UI: Tailwind CSS, Sass/SCSS, Less, Styled Components, CSS Modules, Material UI (MUI), shadcn/ui, Bootstrap, Responsive Design, RTL & Internationalization (i18n)

Testing & Quality: Jest, React Testing Library, Cypress, Playwright, Unit/Integration/E2E Testing, ESLint, Prettier, Code Review

Performance & Web: Core Web Vitals (LCP, CLS, INP), Lighthouse, Code Splitting, Lazy Loading, Caching Strategies, SEO, Web Accessibility (WCAG, ARIA), Progressive Web Apps (PWA)

APIs & Data: RESTful APIs, GraphQL, Apollo Client, WebSockets, Axios, JWT/OAuth Authentication

Tooling & DevOps: Git, GitHub/GitLab, CI/CD Pipelines (GitHub Actions), Webpack, Vite, Turbopack, npm, pnpm, Docker (basics), Vercel, Storybook, Monorepos (Turborepo, Nx)

Architecture & Practices: Component-Driven Development, Design Systems, Micro-Frontends, Server-Side Rendering, Agile/Scrum, Mentoring, Technical Leadership, UX/UI Collaboration, Figma

EDUCATION

Bachelor of Arts in Geography and GIS

University of Alexandria | Alexandria, Egypt | 2016
